2. Description

The database ICULD-0022 contains a list of Xitsonga words from Cuenod (1962) that are identified by a Xitsonga native speaker as active vocabulary. All words were actively used by the speaker; words that the speaker know but not use in her daily life were not included in this database. Xitsonga (S53) is a Bantu language spoken in South Africa, Zimbabwe and Mozambique by about 12 million speakers. As one of the official languages of South Africa, the speech in this archive is based on the Xitsonga variety spoken in and around Giyani and Malamulele in the Limpopo province.
